

CLOCKFACE MANAGER

CLOCKFACE MANAGER is supplied with our **CLOCKFACE+** unit to manage workers personnel information and attendance logs. Once installed on a supervisor's PC, our unique software becomes a key tool in effective workforce management.

Workers can receive customised health and safety graphics which they can view and have to acknowledge, forming a comprehensive audit trail. Text messages can also be sent to an individual worker or group of workers when verifying.

The software also holds personnel details including: Name, address, DOB, emergency contacts, holiday, scanned documents, employment contracts, training and qualifications. This builds into a comprehensive site database for worker details.

Managers can access numerous reports including attendance by trade, company or individual details of training skills & qualifications, muster reports, emergency contact details and many more.

Features and Benefits

- Store worker personnel details in an easy to access format.
- Manage directly employed and sub contractor workers.
- View worker attendance logs.
- Send Health and Safety graphics.
- Send customised messages to individuals or groups of workers.
- Generate management reports

Clear financial savings can be made on payroll and reduced fraud - many clients have found that the system pays for itself many times over.
